

PING 2017: Investigating the Cosmos

Green Bank Observatory, Green Bank, WV

July 23 – August 5, 2017

Are you a current 8th grader interested in science?

The *Physics Inspiring the Next Generation (PING) 2017: Investigating the Cosmos* is a collaboration between the National Society of Black Physicists (NSBP), the Green Bank Observatory and Associated Universities, Inc. (AUI) to expose traditionally underrepresented minorities to science and engineering with a focus on physics and radio-astronomy. While the program targets specifically two White House initiatives, My Brother's Keeper which is working to address the education needs of young men of color, and a second effort to promote interest in science among girls, all current 8th graders are welcome to apply.

Students will be on location at the Green Bank Observatory, and immersed in the research activities of this national research center. While in residence, students will work in small teams supported by an undergraduate student mentor and a staff scientist (astronomer, physicist, engineer, etc.) to conduct research by observing the universe with a 40-foot diameter radio telescope. Supplemental educational activities, including bench experiences building electronic circuits, and coding activities complement the primary research theme. In addition, fun whole group activities like swimming, hiking, and biking take place on the NRAO campus under the supervision of staff.

APPLY TODAY!!

Application Deadline

Interested Middle School students must submit an online application before . . .

11:59 PM (your local time) Weds., April 19, 2017

Link - <https://www.surveymonkey.com/r/PING17>

With a dish larger than an entire football field, the Green Bank Telescope (GBT) is the largest fully steerable radio telescope in the world! Astronomers use the GBT to explore the "invisible" universe, helping to unlock its many secrets!

- 25 "current eighth-graders" will be selected to participate this summer.
- TRANSPORTATION will be provided from the Baltimore-DC Metro area, and Charlottesville, VA. However, Parents may provide transportation from other locations.
- The program is fully funded, so there is **NO COST** to students!

QUESTIONS: Please contact Sue Ann Heatherly - Green Bank Observatory at sheather@nrao.edu
